The MK38 Trap gun is an established performer in all the various trap disciplines at the very highest levels. It is available in a range of two different Grades (1 and 5) reflecting the quality and figuring of the wood and the engraving style. Responding to the needs of many shooters who are unhappy with a stock measurement "off the shelf", Miroku has introduced the MK38 Adjustable. This gun features a stock with a comb that can be moved both up and down and left and right, allowing any shooter to achieve a customised fit.
